

NOTES TO THE ANNUAL ACCOUNTS

STATEMENT 8

Pension Costs (continued)

Other Employees: Other employees, subject to certain qualifying criteria, are eligible to join the Local Government Pension Scheme (which is administered by the City of Edinburgh Council as the Lothian Pension Fund). The Lothian Pension Fund is a multi-employer scheme funded on the basis of triennial actuarial valuations of the required employers' contributions to ensure adequate assets in the scheme. As it is possible to identify the council's share of the assets and liabilities underlying the scheme on a consistent and reliable basis, it is accounted for as a defined benefit scheme under IAS 19.

IAS 19 is based on the premise that an organisation should account for retirement benefits when it is committed to give them, even if the actual payment will be many years in the future. The pension cost under IAS 19 is therefore not the cash contributions paid to the pension fund but the increase in the employers' attributable pensions asset / liability during the year.

The IAS 19 actuarial valuation involves the actuary reviewing the most recent triennial actuarial valuation, updating it to reflect current conditions at the balance sheet date and apportioning assets and liabilities amongst employers. Assets are valued at fair value, principally bid value for investments. Liabilities are valued using the projected unit method which assesses the future liabilities of the fund discounted to their present value. The 2023/24 discount rate was 4.8% (4.75% 2022/23). The inclusion of attributable scheme assets and liabilities in the balance sheet represents an authority's commitment to increase contributions to make up any shortfall, or its ability to benefit, via reduced contributions, from a surplus in the scheme.

The actuary identifies the following elements of pension cost charged to the Income and Expenditure account:

Actuarial gains and losses – these consist of experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effect of actuarial assumption changes in regard to financial and demographic assumptions.

Current Service Cost - the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Net Defined Benefit Liability (asset) – the present value of the defined benefit obligation less the fair value of the plan assets.

Net interest Income (expense) – the change during the period in the net defined benefit liability (asset) that arises from the passage of time. This includes allowance for interest on the current service cost.

Past Service Costs – the change in the present value of the defined benefit obligation for employee service in prior periods resulting from a plan amendment.

Any difference between the accounting cost (i.e. the IAS 19 based cost) and the funding cost (i.e. the contributions or payments made during the year) is appropriated from the Pensions Reserve to the Movement in Reserves Statement. This appropriation ensures the IAS 19 pension cost equals the pension payments funded from taxation.

Pension Net Asset Restriction Calculation

The actuary has calculated the council's IAS19 defined benefit plan surplus for 2023/24 to be £311.841 million as detailed in notes 20.2 to 20.10 to the accounts.

For IFRIC 14 accounting purposes, the actuary has calculated that the net present value of the future contributions of £2.790 billion exceeds the future service costs of £2.653 billion by £136.7 million, a negative contribution. As a result of this calculation, IFRIC 14 advises that no defined benefit plan asset should be recognised in the council's balance sheet and there is no requirement to recognise the £136.7 million difference as a liability. The council therefore has reported no long term asset or long term liability in the balance sheet for Pensions in 2023/24 or 2022/23.

Contingent Liabilities

A contingent liability arises where an event has taken place that gives the council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in the Notes to the Annual Accounts. Details of the liabilities are shown in note 28.

Provisions

Provisions are made where an event has taken place that gives the council a Legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential and a reliable estimate can be made of the obligation. Provisions are charged as an expense to the appropriate service revenue account in the Comprehensive Income and Expenditure Statement in the year the council becomes aware of the obligation, based on the best estimate of the likely settlement. When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year and appropriate adjustments made to the level of provision. The council's liabilities on the balance of the provision held in 2022/23 have been fully discharged during 2023/24. Details of the movement in year is detailed in note 18.

VAT

Income and Expenditure excludes any amounts related to VAT, as all VAT collected and paid is payable to, or recoverable from, Her Majesty's Revenues and Customs (HMRC).

Prior Period Adjustments

Prior Period Adjustments arise as a result of a change in accounting policy. Where a change is made it is applied retrospectively by adjusting opening balances and comparative amounts. There have been no prior period adjustments in 2023/24.

2. ACCOUNTING STANDARDS THAT HAVE BEEN ISSUED BUT HAVE NOT YET BEEN ADOPTED

For 2023/24 the following accounting policy changes require to be reported as issued but not yet adopted by the code.

- Lease Liability in a Sale and Leaseback (Amendments to IFRS16) issued in September 2022. The amendments to IFRS 16 add subsequent measurement requirements for sale and leaseback transactions.
